This is a great small game. Simple enough to not be overwhelmed, complex enough to keep you coming back to see more little details. Also, it's super satisfying to start a new game and see your humankind go from pulling berries from a bush as only means of getting food, to building big cities with cars riding everywhere. The card aspect gives extra challenge, you never know what cards you will get next, so you need to make decisions on the go on how to approach next steps of evolution. If that's not for you, you have endless mode, where you can do whatever you want whenever you want - as long as you have enough faith (works like mana to use cards). There are multiple ways to guide your humans, and they might turn out different if you do things in different order. Game also doesn't keep your hand at any time, but in this case, that's good. The content is limited, so you need to experiment and do some trials and errors to understand how to guide the humanity to shape them the way you want. This will take time, but is very satisfying.

Overall, for me it is one of the best God games there is, even though it doesn't have physics or a compelling campaign. The only thing I would like to see next, is more progression, or more unlockables for next playthroughs. It is still pleasant enough to keep coming back to it, but I guess it might get boring after few hours. But for this price, it is more than worth it.. One of the early levels have only 3 first actions, and they all fail, making the level unsolvable. The meditation levels have a time limit which also makes them impossible to solve. Other levels are only playable when the unsolvable are solved. This makes the game useless by design.. InvestGames:

That, unfortunately, is the answer.. Not a bad game, basically a text version of the Sims brought down to the basics and a little harder. You can probably finish this game at the "normal" difficulty plus all tutorials and achievements in around 15 hours, tops.

[Feels like you could invest your time in other games, gets really repetitive and you basically just click on boxes until the week is done, refresh repeat, add some automations "services" and then lower the amount of clicks.](#)

[Would need more content to be a recommended purchase. Get it on sale to kill the time](#)

I felt like I was the starring role in a movie. It was so much fun. Making choices that matter, difficult decisions, and how it follows up magnificently from the previous parts of the trilogy.

All 3 of them are well worth enjoying and this one is the summit of their storytelling and masterful working of emotion, feeling and expression.

To anyone who enjoys stories and superheroics, I can't recommend this or its predecessors highly enough.. tt this is a complete mayham, the multiplayer! Love the AI crashing into one another, great fun for a while and with friends for a small price! Also insane2 is usually in a bundle at bundlestars for arround 3-4 bucks with several other games, keep your eyes open!. i would prefer if the driving was better a bit more like gta v controllls

. Are you kidding? "It's Killing Time" is so bad, it's funny. I was actually laughing out loud at how much more ridiculous the story got with each passing chapter. It's hard to explain without revealing any spoilers. But that's part of the problem. The story is so poorly written, it drops spoilers on itself. Predictable is too mild a word. The characters are so 1-dimensional, that you can just match them up with their 'Creative Writing 101' archetype when they are introduced. At first there was disappointment with these flaws. But about half way thru, the story reached a point of absurdity that I couldn't help smiling at how awful it was. I also couldn't help but use the 'vast power of my imagination' to envision the author asking himself - "How big a turd will these Choice of Games people pay me to pop out?" The big twist is beyond telegraphed. It's like when a little kid tries to whisper something to you and its louder than if he had spoken in his normal voice. And this so-called twist is delivered to you by a character that is even too campy to be a Bond villain - it's all just laughable! This is the kind of game you gift to someone as a practical joke. I am seriously asking - was this \*meant\* to be funny? I can't tell.

But I feel kind of guilty wondering if it may have been a genuine effort at entertaining people. Oh ... that's sad. Now I feel bad again. To avoid inflicting upon others the crushing sense of despair that comes from realizing someone might have poured their heart and soul into something so dreadful, I can't recommend this story\game to anyone. Advice for the Choice of Games people - replace 'ultra-violent' with 'ultra-hilarious' in the game description and repackage it as an assassin parody- but don't tell the author. Then I will come back and give the game a thumbs up.

Now I guess I'll go take a magic healing bubble bath that can help cure gunshot wounds, just like the hero of the story does after a tough mission. I'm not kidding. It's just that ridiculous.. I've probably logged more hours on the Front Office Football series than the Civilization series. It may seem daunting at first but you can play and win with varying degrees of input. If you just want to be a general manager, you can let your staff handle all of the gameplanning and you can still do well. If you just want to coach, you can do that to. While it may not be the prettiest, it has everything you want to make a fun and deep football experience.. My head hurts but I'm sure this game is preparing me to be an astronaut.. 10/10 kinda... It's just good, buy it it's only two dollars.. Really fun, really funny, lots of laughs in multiplayer mode. Simple controls and gameplay make it great for kids.

8yo comment: It's really really funny and it's a very interesting game. And try not to lose your makers!

7yo comment: BUILD! BUILD BUILD BUILD BUILD BUILD! Cool, funny, BUILD! (Drown.). I completed the game late last night and I have to say that this is a game like no other! While obviously, there is some inspiration from the FNAF games, as well as Jim Henson's creations like Sesame Street, the atmosphere, gameplay mechanics, and difficulty of this game are completely unique. This is by no means a perfect game, but I loved how unique it was, and that the developers took a chance at something simple, yet so addicting.

The jumpscare were great at first, but got a bit repetitive towards the final few floors. I also found that the inability to use your flashlight when pressing space-bar half the time got quite annoying, and didn't really add to the atmosphere of the game. The atmosphere is AMAZING though, and as you get closer and closer to the end of a floor, it gets incredibly intense. I raged so many times while playing this game, but kept coming back for more, it's just that addicting.

Be warned, this game is VERY difficult. I'd say it's harder than all of the FNAF Games, but there was so much satisfaction when I finally finished the final floor and was rewarded with a very confusing ending. Although I have already done a full lets play of the game, I will look for more hints, secrets, and clues, and try to piece together the story of this game. I do believe that there is a deep lore in the game, and I want to find out why there are these puppets that are attacking Tim Denson.

I would highly recommend this game to anyone who is looking for a very unique horror experience, and doesn't mind

EXTREMELY difficult games. While it certainly has its flaws, it truly is a game like no other.. I enjoyed this short puzzle game. It took me two hours to complete to 100% but you could do it in no time by following the walkthrough they provide. I did need to use the walkthrough a few times so it certainly isn't easy. The difficulty level is just about right I would say as I felt quite chuffed when I actually worked things out without cheating.

I would say the normal price is a bit steep perhaps. I bought it on a 50% sale and I would say that's about right.

I could have asked for a refund seen as I completed it before the 2 hours were up but I enjoyed it enough to keep along with my 100% achievements.
